SHAYONANO USA, INC.

12503 Exchange Drive, Stafford, TX 77477 832-539-4792

ShayoNano USA, Inc., a subsidiary of ShayoNano PTE, Ltd. Singapore, announces the inauguration of its first US production facility in the Houston suburb of Stafford, TX.

A ribbon cutting ceremony was held May 23rd, officially opening a state of the art facility that will increase production capacity for a variety of ShayoNano's nanochemistry products for the Paints and Coatings Industry, including SmartHide™, an economical alternative to titanium dioxide. The facility employs revolutionary piloting capabilities for new product scale up and process development.

On hand for the ceremonial ribbon cutting were Mahesh Patel, the company's CEO, Jeff Wiley, President of the Greater Fort Bend County Economic Development Corporation and Cyriac Alexander, CEO of Alexander Technical Institute (ATI), as well as many industry and community stakeholders.

"This plant will serve as a model for future planned North American production sites as we continue to expand our mission to bring affordable nanochemistry products to meet the needs of paints and coatings manufacturers," says Patel.
